South Bend, Indiana

To Whom It May Concern,

I just wanted to let everyone know how well the REST machine is doing for our facilities. The intent when we purchased the REST machine was to see if it was going to have a calming effect on our individuals. It has and continues to work as a great tool to assist in behaviors.

I would recommend the REST machine to any organization that has children or adults with an Intellectual or Developmental Disability.

It is amazing how only in a few short minutes the REST machine with its gentle movements has a calming and settling effect. Leveling out a potential behavior back to a state of coping with surroundings with issues no longer being issues.

If your organization faces these issues on a regular basis this machine is an answer that we all in this profession look for. Harriet was extremely cordial and upfront about all the benefits of the REST machine. We are sold on it and I am happy that we purchased our REST machine from GAIT, LLC.

Warm regards,
Michael Pierce
